

COUNTY OF ALBANY, NEW YORK

AMERICAN RESCUE PLAN ACT - EFFECTIVE SERVICE DELIVERY APPLICATION

For the past three years, Albany County has been leading our community through COVID-19 response, monitoring, and recovery. The infusion of \$1.9 trillion in flexible funds provided through the American Rescue Plan Act of 2021 (ARPA) allows local governments, like ours, the opportunity to invest in technology to support long-term recovery efforts while delivering better services to our constituents now and in the future.

To take advantage of this opportunity, the County is soliciting Departmental proposals for up to \$100,000 in ARPA funds for projects that will improve service delivery through investments in data analysis, program evaluation, process improvement, community engagement, and public accessibility to programs and services.

Applicants are encouraged to identify non-ARPA funding sources to complement their ARPA funding requests. Applications for projects with total budgets exceeding \$100,000 must identify all other funding sources that have been secured to support their project. While applicants are strongly encouraged to adhere to the \$100,000 funding cap, projects in need of more than \$100,000 in ARPA funds may be considered by the County Projects Subcommittee on a case-by-case basis if they are deemed to be high-impact and will be fully funded after receiving ARPA funds.

As you develop an application consider strategic technology investments your Department can make to ensure the required digital infrastructure is in place to provide stability for citizen-facing and backend services. Projects should target needs identified during the COVID-19 pandemic and should further improve your Department's ability to maintain successful continuity of operations while also supporting future needs.

Completed applications form should be emailed to: tvouzakis@capmark.org by November 3rd, 2023

Applicants are encouraged to include backup materials with their submissions that justify the project need, impact, and budget

<i>Project Name</i>	Paperless Pre-Employment Orientation
<i>Department</i>	Department of Human Resources
<i>Project Manager</i>	Jennifer Clement, Commissioner
<i>Select ARPA Expenditure Category</i>	1: Public Health Other Public Health Services^

1. Project Eligibility

Please identify which of the following categories best describes your project:

- 1) Program evaluation
- 2) Data analysis: resources to gather, assess, share, and use data
- 3) Technology infrastructure to improve access to/user experience of government IT systems and/or increase public access to services
- 4) Community outreach and engagement activities
- 5) Capacity building resources to support using data and evidence to improve service delivery
- 6) **Equipment purchase to improve service delivery**

6

2. Project Overview

Summarize your proposed project including a description of how it will improve the way your department delivers services

The Albany County Department of Human Resources will purchase 15 (fifteen) automated external defibrillators and 3 (three) training units, (Physio Control CR2) to replace old and outdated equipment. These devices will be placed at various facilities in the County and will ensure that all AED units are the same for ease in training and employee use. AEDs greatly increase the chance of survival in the event of sudden cardiac arrest. By placing more of these devices in County facilities the County is serving the best interests of their employees as well as the public who utilize these facilities everyday.

3. Project Need

Please describe how your project responds to a need that was caused or exacerbated by the COVID-19 Pandemic

As a result of COVID-19 a greater awareness was placed on personal physical health. Additionally, a greater awareness of those identified with compromised immune systems and additional risk factors which pose a greater risk to medical disease was identified. These greater risk groups are exposed regularly to a greater chance of medical and cardiac related events. The awareness to these groups being identified was a positive outcome of COVID 19 in that now that awareness is done, the County can work to provide the best possible resources in the event of a medical emergency.

4. Project Implementation

Describe the major steps in your project implementation including coordination with any internal and external partners, especially coordination with the Division of Information Services.

Following the procurement of the 30 iPads, the Department of Human Resources will rely on the expertise of the County's Information Technology to install the proper software, connect to the County network, and conduct any routines and upgrades. PEO specialists will then need to be trained to ensure they can easily navigate the system and communicate with new employees using the iPads to complete their online paperwork. iPads will need to be charged regularly and stored in a secure location.

For IT-related project, have you consulted with the Division of Information Services? YES NO

5. Project Timeline

All ARPA funds must be expended by December 31, 2026. Please provide the estimated date that requested funds will be fully expended and highlight key project milestones

All ARPA funds for this project will be expending during the 2024 calendar year. This will ensure funding expenditure by the deadline.

6. Project Impact

Please describe in detail how this investment in your Department will allow you to address the project need identified above and more effectively deliver services to the public. Describe whether the project directly or indirectly benefits County residents. Use quantifiable metrics where possible and discuss how project impact will be measured

The current AEDs in some locations are greater than 7 years old, and are becoming obsolete technology. By purchasing the same devices as the rest of the County it will allow for a more streamlined approach to training, as well as cut costs moving forward. The cost cutting in the future will be accomplished by only needing to maintain one stock of replacement equipment and parts. The cost of purchasing training devices will also decrease as all equipment will be uniform.

7. Project Budget

<i>Please Identify:</i>	
1) ARPA Funding Requested	\$52,000
2) Total Project Budget	3 AED trainers with remote control (\$10,000). 15 AEDs with carrying case, wall mounted bracket/case (with alarm) and signs (\$42,000).
3) Non-ARPA Funding Sources and Amounts	N/A
4) Recurring Costs	Battery replacements and AED electrode pad replacement every 4 years at a cost of \$5,000.

8. Project Sustainability

Will the project be sustained after ARPA funds are expended? YES NO

If yes, describe how your Department will address any ongoing project costs

The purchase of replacement electrode pads and batteries are minimal expenses and can be built into the supplies and equipment budgets of this Department. These minimal contractual expenses wi
