

**The Department for Children, Youth and Families
Justification for Contract Authorization with St. Anne Institute
for the Provision of Specialty Prevention Services.**

The Department for Children, Youth and Families respectfully requests legislative authorization to enter into a contractual agreement with St. Anne Institute—Juvenile Sex Offender Program for the provision of Specialty Prevention Services. The requested contract term is for January 1, 2021 – December 31, 2021 for the amount of \$153,618. The total prevention contract amount for St. Anne Institute is \$522,356. The Department desires to exercise its second and final option under the contract, to renew the agreement.

The Department, in collaboration with the Department of Probation, issued a Request for Proposals for Prevention Services—*RFP-2018-063-- PREVENTION SERVICES: Juvenile Justice Services, Clinical Services with Community and Recreational Supports, and Specialty Services* on May 17, 2018 with responses due June 29, 2018. Prevention programming focuses on either preventing children from entering foster care, detention or shortening their stay if placed in either. Children enter care either as a result of abuse, neglect and/or Juvenile Justice involvement.

The Department recognizes the importance and necessity for the development of effective collaborations in order to meet the complex needs of families and children within the shrinking fiscal resources. As such, the RFP issued promoted innovative, creative approaches to meet the needs of children and families and allowed much flexibility for agencies to propose how to most effectively do so. It does require a formal collaborative, whereas the prevention service has a reciprocal relationship with either a Youth Bureau funded, and/or community agency for the children and their families to have diverse, holistic programming of formalized and recreational/community based services. It also requires that all children in the family that are five (5) years and older, must be engaged in at least one consistent recreational or community support activity. The parent/guardians must also be engaged with a community support activity. The idea is that these supports will remain in place for the family when the formal services have ended.

Due to the complex challenges facing families, there are times when Specialty Prevention Services are required to assist families in addressing the safety, permanency and well-being of their children. These specialized services may be a supportive, time limited service to address a specific family member's need or it may be a specialized service which is provided to all family members. These services are designed to prevent the reoccurrence of child abuse/neglect, youth entering or re-entering foster care or to expedite permanency for children and youth in foster care.

Specialty Prevention Services include face to face contact with the family at a minimum once (1) per week, for a minimum of one (1) hour. Such contact must occur at least twice (2) monthly in the family residence. Such services occur in a variety of locations but the family need dictates this. As the families' designated case planning agency, the provider will be responsible for service coordination amongst any other agencies involved. For those Specialty services which are clinically based, such clinical services must include: assessment, diagnostic testing, clinical and specialized therapies provided by a person who has received a Master of Social Work degree, Master of Mental Health Counseling degree or is a licensed Psychologist. Assessment and clinical services are to include family and individual interviews, contact with collateral agencies, schools, extended family and natural supports and diligent communication with Albany County staff.

St. Anne Institute—Juvenile Sex Offender Program proposed to provide specialized clinical and case management services to youth, ages ten (10) to eighteen (18) years, who have engaged in sexually inappropriate, aggressive, or abusive behavior. The program will also serve the targeted youths' families, including the parents or other caretakers and siblings. The purpose of this program will be to prevent these youth from entering foster care and also where appropriate, to facilitate their safe and timely return home from foster care. St. Anne Institute services will include clinical and case management services and will also focus on the development/enhancement of natural community and neighborhood supports, so that the children and families will be able to maintain these connections after services end. This program will serve ten (10) youth and their families at one time.
