8608 and 8520C Asphalt Pavers

LeeBoy®
THE HEAVY CONSTRUCTION PAVING SPECIALIST

LeeBoy Heavy Commercial pavers deliver features and benefits needed to compete and win against other brands.

- LeeBoy's designs in this class represent the highest production pavers minimizing power losses with more efficient hydraulic systems.

Features & Benefits

- Pound for pound, LeeBoy produces the most powerful Heavy Commercial Pavers.
- The standard Legend HD screed provides the same 116 psi compaction effort of the Weiler screed without the additional weight. The Pro screed is an upgrade over both at 17 psi.
- S-curve heating elements also provide more even heating of the screed plate.
- Belt driven generator provides less power loss, lower hydraulic heat load since it is a more efficient design.
- Higher auger speed, full size end auger flight, and rounded auger back provides better material feed to extensions.
- The 8608 boasts longest in class track length with the most ground contact lowering psi for less base disturbance.

- 8608 Oscillating Bogies improve ability to drive out of a cut or over piles without disturbing screed.

- The 8520C provides more clearance when paving around obstacles or curbs due to tracks being inside of the frame.

- Both LeeBoy pavers are capable of counter-rotation for positioning in tight spots.

- Both the 8608 and 8520C have increased throat and auger tunnel volume allowing for increased paving distance on a single dump of material.

- Telematics standard allowing LeeBoy dealers to monitor service intervals and provide real-time diagnostic assistance remotely.

- Full-width tilting hood provides superior service access to all systems aiding in radiator cleanout.
