The new 15,480 sf structure will include 4 heated drive through double bays, two unheated drive through double bays, as well as office space, a breakroom, bathroom facilities and storage areas. A geothermal heat pump system and roof mounted photovoltaic solar panel arrays will be installed and the building envelope will meet and exceed the requirements of the current NYS Energy code. Additionally, the building incorporates the collection and reuse of rainwater from the roof for washing trucks and other maintenance activities.
