Date of Adoption: Click or tap here to enter text.

Justification: (state briefly why legislative action is requested)

The Albany County Climate Resiliency Plan identified the Watervliet Firehouse, located on the edge of the FEMA 100-year floodplain, as being at high risk of vulnerability for future flooding events. Finding a suitable site for a potential new fire station was identified as a proposed project in the study and the County has been working to support the City's efforts. The City requested match funding to support a feasibility study to identify potential sites for this critical community asset. Completing a feasibility study would assist the City in securing state and federal grant fund for design and construction of a new and more resilient facility in the future.
