**Justification:** (state briefly why legislative action is requested)

Bond resolution is required to pursue funding and grant opportunities from Environmental Facilities Corporation (EFC) to demonstrate the County's commitment and borrowing capacity for this project. Project to include the study, design and construction of a new septage and Fats, Oils and Grease (FOG) receiving stations. Study will evaluate alternatives for both the septage receiving station and the FOG receiving station. For the FOG system a brown grease separation process that can produce a biodiesel feed stock will be evaluated against directly injecting FOG into the sludge incinerators to reduce natural gas consumption.
