## **MEMORANDUM**

**TO:** Lisa Ramundo - Commissioner DPW  
**CC:**  
**FROM:** Laura DeGaetano, Sr. Natural Resource Planner  
**DATE:** July 14, 2022  
**RE:** SEQR Compliance for DPW Projects  
**SUBJECT:** Rensselaerville Substation Steel Shed

---

I have reviewed the documentation provided for the above referenced project as it relates to State Environmental Quality Review (SEQR). The project includes removal of an existing metal storage structure at the Rensselaerville subdivision and replacement with a 60' x 60' metal structure. The new structure will be located on previously disturbed land within the subdivision property.

As described above, this project meets the criteria established for SEQR unlisted actions. Accordingly, a short environmental assessment form (see attached) has been completed. This action has been determined not to have a significant impact on the environment and as such, no procedural compliance beyond this determination is required at this time.

Should you have any questions or require additional information, please feel free to call me at your convenience.
